Veito Carbon Infrared Heaters

Veito Infrared Heaters is a new series that is adapted for installation both indoors and outdoors. Veito Infrared Heaters are manufactured using the latest carbon fibre technology in combination with high quality electronics. They are sturdy and durable in their design with heating elements that last for a long time. Design is important and with Veito Infrared Heaters you get a modern and stylish solution that is perfect for home, outdoor, patio, bathroom, restaurant, garden, bistro, cafe, office, workplace, gym, courtyard, stables or recreation room.

Veito Infrared Heaters is built on the latest carbon fibre technology that draws inspiration from the sun's function. Carbon fibre technology means that floors, furniture and people are heated with the infrared rays and no energy is wasted in heating the air. This results in optimal utilization of the energy with savings of up to 25% compared to traditional infrared heating. Veito becomes an environmentally smart choice!

Many of the Veito models are waterproof with a high IP55 / IP44 rating. This means that you can place them indoors, for example. bath & shower rooms, and outdoors without roof protection, as they can withstand rain or water. The grille is made of stainless steel, class 304, and each part of the infrared heater is carefully designed to provide a strong and long service life. Most models come with a remote control, which means you can turn on / off and control the effect.

Mounting kits consisting of suspension devices are included.

The following models can be ordered - See below!

veito

Veito CH1800RE Black

Veito CH1800RE Black is a stand-alone infrared heater, complete with an adjustable height stand (820-1350 mm) and a choice of four different temperature settings: 900W, 1200W, 1500W and 1800W. This model also comes with a remote control that automatically regulates power consumption based on your chosen temperature. Overheating protection is standard, and it also has a timer function where it switches itself off automatically after the set time. With its aluminium construction, and the built-in carrying handle, it can be easily moved between different locations. Veito CH1800RE Black was named best infrared heater in the UK in 2018:
